
REPORTING RELATIONSHIP

- Reporting to: Senior Manager Underground or Senior Manager Open Pit
- Direct Reports: Senior Consultants & Consultants

POSITION PURPOSE

The purpose of this position is to provide technical and engineering solutions along with business improvement outcomes for our clients and stakeholders. This is a collaborative and supportive role requiring the use of technical mining best practice to deliver value for our new and existing customers.

KEY ACCOUNTABILITIES

- Act in the best interests of Perenti, by working within legislation that underpins the company's operation, as well as ensuring that decisions are based on the achievement of Perenti objectives.
- Ensure conduct which is consistent with Perenti values, policies, systems, procedures and statutory requirements.
- Ensuring a safe working environment, being a visible leader for safety, and providing a daily commitment to zero harm to employees, contractors, environment and the community.
- Develop and maintain positive relationships with key stakeholders, including but not limited to, Perenti clients and client representatives, employees, management and supplier contacts.
- Coach and mentor team members and support the development of career pathways for our people.
- Participate in growth initiatives to support wider business objectives.
- Identify, recommend, and execute business improvement opportunities in line with industry best practice.
- Ensure all works under area of control are completed to a standard that is fit for purpose and meets the end users' requirements.
- Advise on Pit and/or underground mine design, scheduling, reserve estimations, cost modelling and operational effectiveness.
- Provide study management, scope budget and schedule control.

TRAVEL REQUIREMENTS

- Based out of St Georges Terrace, Orelogy building
- Ad hoc Australian and International travel is required for this role

REQUIRED SKILLS, KNOWLEDGE, QUALIFICATIONS & EXPERIENCE

- Bachelor Degree in Mining Engineering (or the equivalent).
- First Class Mine Managers (FCMM) Certificate of Competency will be highly regarded.
- 10 years in-depth Technical and Operational experience across different mining methods.
- Minimum of 5 years supervising teams.
- Technical report writing skills.
- Effective verbal and written communication.
- High level of computer literacy, with advanced capabilities in specialist mining software such as such as Vulcan, Deswik, MineSight, Surpac or similar.
