

# Orelogy

## Where do you fit in the Mine Cycle?

### Engineering Above, Below & Beyond

Orelogy is not a traditional “desktop-only” consultancy — and we’re not labour hire either. We exist in the space between strategy and execution, and that’s exactly where experienced engineers add the most value.

If you are currently working on site in technical services planning and / or production roles, Orelogy offers a pathway to broaden your career without disconnecting you from real operations. Conversely, if your work is primarily desk-based, Orelogy provides opportunities to utilise your technical knowledge while enriching your operational experience.

**This is a quid-pro-quo model: flexibility from you - depth, variety, and meaningful opportunities from us.**

#### About Orelogy

Orelogy is a specialist mine engineering consultancy that has spent two decades delivering innovative solutions for global mining projects. Our comprehensive capabilities cover the entire project life cycle, from studies, cost modelling and project management to governance and operational support.

#### Available Positions

- Principal Mining Consultant  
10 + years Technical & Operational Experience
- Senior Mining Consultant  
Minimum 5 years experience in Open Pit or Underground
- Mining Consultant  
Minimum 2 years experience, completion of Open Pit or Underground time essential
- Senior Ventilation Consultant  
7 + years in-depth Ventilation engineering experience in Underground mining
- Senior Geotechnical Consultant  
7 years of Geotechnical experience across different mining methods

#### Why Us? The Perenti Advantage

Orelogy benefits from the unique advantage of being part of the Perenti Group, a diversified ASX-listed, mining services leader. This partnership gives us-and you-a unique competitive edge:

**Unmatched Resources:** Leverage the stability and financial backing of a global group with over 10,000 employees operating across four continents.

**End-to-End Synergy:** Work within a "wider ecosystem" allowing your technical work to be applied directly to real-world mining and drilling operations.

**Career Growth:** Enjoy the variety and agility of a specialist consultancy with the professional development and lifestyle benefits of a large-cap listed group.

#### Join Our Team

If you want to combine deep technical domain knowledge with the career security of an ASX-200 powerhouse, we want to hear from you.

We are actively seeking candidates for **multiple Consultant positions**, whatever your background – Open Pit or Underground, get in touch!
