

Engineering Above, Below & Beyond

What We Offer

Unmatched Resources: Leverage the stability and financial backing of a global group with over 10,000 employees operating across four continents.

End-to-End Synergy: Work within a "wider ecosystem" allowing your technical work to be applied directly to real-world mining and drilling operations.

Career Growth: Enjoy the variety and agility of a specialist consultancy with the professional development and lifestyle benefits of a large-cap listed group.

Competitive Rewards: We offer attractive remuneration packages, professional development opportunities and performance-based incentives.

Why Orelogy?

At Orelogy, you don't need to choose between operations and consulting. Our people work across a diverse portfolio of studies, projects and operational support assignments while maintaining strong connections to real mining operations.

You will gain exposure to:

- Open Pit and Underground operations
- Multiple commodities and mining methods
- Operations, studies and project development work
- Global clients and jurisdictions
- Corporate and site environments
- Cross-functional project teams and technical disciplines

Our Commitment to Diversity

At Orelogy, we strongly believe in equal opportunity and recognise that businesses are strengthened by diversity. We are committed to creating an inclusive workplace where people from all backgrounds can thrive and contribute their unique perspectives.

Australian & Global Positions

Perth

London

Vancouver

Join us and be part of every stage of the Mining Cycle!

Orelogy is a specialist mining consultancy with global, multi-commodity expertise across both open pit and underground mining. With offices in Perth, London, and Vancouver, we deliver solutions across the entire mining lifecycle, from studies and project management through to operational readiness, operational support and governance.

With a rich history spanning more than two decades, Orelogy has been a trusted partner to mining companies worldwide, helping clients solve complex challenges and deliver practical, value-driven outcomes.

Orelogy benefits from the unique advantage of being part of the Perenti Group, a diversified ASX-listed mining services leader. Orelogy combines the agility and technical depth of a specialist consultancy with the strength, stability and opportunities of a global mining services organisation. Today, our team combines extensive technical expertise both **ABOVE** and **BELOW** ground with a focus on delivering practical, value-accretive outcomes that extend **BEYOND** the mine face. As we continue to grow, we are seeking **Expressions of Interest** from talented professionals interested in opportunities across our **Perth, Vancouver and London** operations.

The Orelogy difference?

- **Practical Consulting:** We value operational credibility as much as technical expertise. Our recommendations are built on practical mining experience and real-world outcomes.
- **Broad Career Development:** Build transferable skills across studies, operational improvement, project delivery and consulting leadership.
- **Global Opportunities:** Collaborate with colleagues and clients across Australia, North America, Europe and other mining regions.
- **Flexibility and Variety:** Enjoy the diversity of consulting work while remaining connected to the mining industry and its operations.
